

MIDLAND CUSTOM DESIGN GUIDE

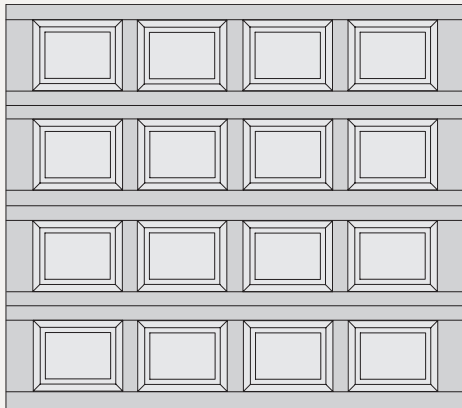

TRADITIONAL SERIES GARAGE DOORS

Featuring an Advanced Polymer Composite skin that will not dent, rust or delaminate. The Traditional Series is perfect for residences that want the classic multi-panel motif with numerous window options.

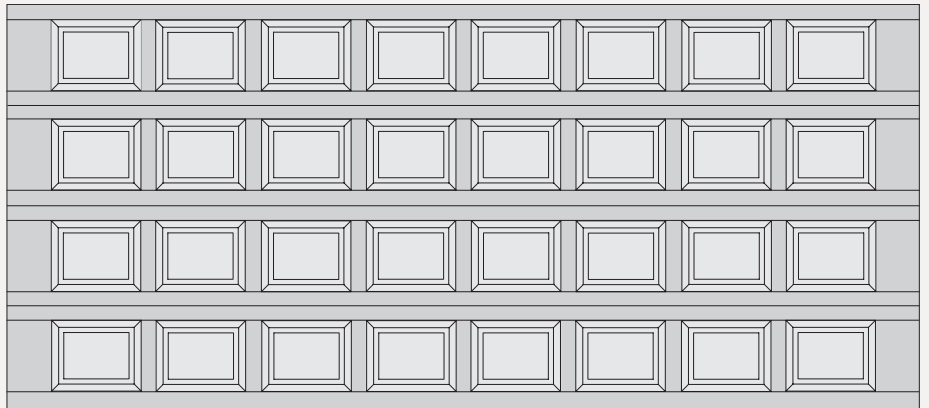

Come factory thermal-set primed, ready to paint. The Traditional Series is available in 8', 9', 16' and 18' widths, and heights beginning at 6'4". Doors are 1-3/8" thick, completely packed with environmentally safe CFC expanded polystyrene. The inside of the composite skin, which is flat, is dust and dirt collection free.

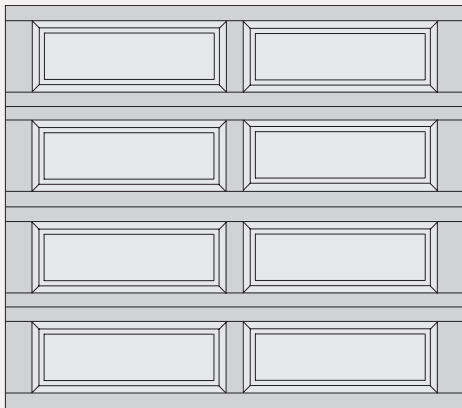

Door #1 Short Panel Single Car

#2 Long Panel - Single Car

#2 Long Panel - Double Car

Windows for Traditional Series are found on page 4.

THE RICH LOOK OF WOOD

Each panel contains a deep-definition, wood-grain pattern. Grain direction is correctly registered to simulate the texture of an actual wood door. Compared to steel doors; composite is simply superior. Comes primed and ready to paint.

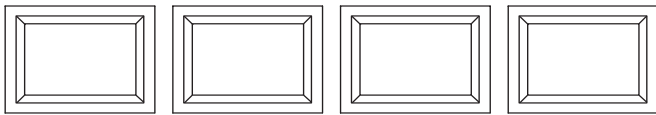

Variations in door sizes may change the appearance of the door.

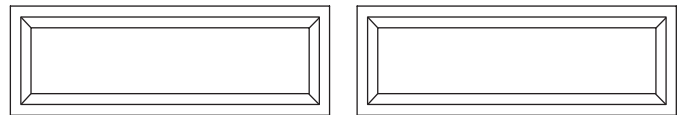

WINDOW OPTIONS FOR TRADITIONAL SERIES

Every home has an appeal that can be enhanced with garage door windows to complement what the architect had in mind. One of these designs may be just what completes your home's curb appeal. Doors may be shipped open so you may select your own glass or glazed from the factory with 1/8" tempered safety glass. Tempered glass withstands abnormal force and does not break into sharp pieces, giving you peace of mind.
